Cleaners

- ProKleen 1000** Is a heavy-duty caustic spray cleaner for ferrous metals. It incorporates a blend of surfactants that are stable in a high caustic solution, allowing them to maintain their effectiveness. A high tolerance for contamination provides for sustained cleaning power and longer tank life. This product was developed for strip cleaning applications.
- ProKleen 1100** This general purpose alkaline spray cleaner is safe for all metals. Soil removal is rapid and rinsing results in a film-free surface. Designed to be used at 3% to 5% by volume at 100° to 160° F, it is safe on all metals including, aluminum, magnesium, zinc and copper alloys.
- ProKleen 1200** A non-silicate, amine free, spray cleaner. It incorporates a unique blend of surfactants that are effective in removing heavy soils. It has been formulated with water softeners and sequestrants to provide a completely rinsed surface with minimum scale and sludge build-up in the bath. Safe for ferrous, aluminum and other non-ferrous metals.
- ProKleen 1300** An organic spray cleaner that exhibits excellent rust protection. This product is safe for all metals, is very low foaming at ambient temperatures, and is silicate and phosphate free. It is designed to be used at 3% to 5% by volume at ambient to 160°F in single stage washers.
- ProKleen 1400** This organic /inorganic spray cleaner is silicate and phosphate free. This product also has excellent rust protection, is safe for all metals, and is extremely low in BOD's and COD's when waste treatment is a major concern.
- ProKleen 2000** A heavy-duty caustic soak cleaner for ferrous metals. It incorporates a blend of surfactants that are stable in a high caustic solution, allowing them to maintain their effectiveness. A high tolerance for contamination provides sustained cleaning power and longer tank life.
- ProKleen 2100** This general purpose caustic soak cleaner is safe on all metals including aluminum, magnesium, and copper alloys. Soil removal is rapid and rinsing results in a film-free surface.
- ProKleen 2200** A non-silicate neutral pH soak cleaner. It is not corrosive and therefore requires no corrosive labels or special shipment procedures. It is easy on workers hands. It is designed to be used at 3% to 5% by volume at 100° to 160°F.
- ProKleen 3001** A highly concentrated liquid general purpose cleaner incorporating a specific blend of penetrates that quickly and effectively lift grease and oil. It has been proven to be an extremely effective floor cleaner. With a pH of less than 10, it is safe on painted surfaces and will not harm hands or clothing. It does not contain phenols, strong alkalis, acids, or other corrosive chemicals.
- Wococlean 48** A machine sump/central system cleaner specifically formulated to clean dirty metalworking systems, providing a clean, contaminate free system ready for recharge with fresh coolant. It works to clean grit, grime and kills bacteria, yet contains no phenol, nitrites, phosphates or heavy metals.
- Kleen Green** A versatile general purpose cleaner that can be used in many applications in an industrial plant. Its concentrated formula is strong enough for the tough jobs, and mild enough for the easy jobs. It does not release toxic or caustic fumes.
